A Fax cover sheet is attached to this Office Action for your convenience. We encourage your participation in this Pilot program. If you have any questions or suggestions please contact Jyothsna Venkat, Ph.D., Supervisory Patent Examiner at jyothsna.venkat@uspto.gov or 703-308-2439. Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to Written Restrictions.

Election/Restriction

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Art Unit: 1627

- I. Claims 38-43, 62, 70, drawn to a kit comprising a tubing to be adapted to a blood constituent source to convey blood constituent source, classified in class 422, subclass 44.
- II. Claims 44-48, 55-62, 71-72, 75-76, drawn to a kit comprising a tubing adapted to the tubing to remove cellular material from the plasma, classified in class 422, subclass 44.
- III. Claims 49-54, 62, 73-74, drawn to a kit comprising tubing adapted to the tubing to separate cellular matter from plasma, classified in class 422, subclass 44.

5. The inventions are distinct, each from the other because of the following reasons:

Inventions of different groups I-III, are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to different kits which are distinct from each other, and the kits of different groups do not require the other for using in blood transfusion.

Eventhough the groups are classified in the same class/subclass, this has no effect on the non-patent literature search. Different kits (different group Inventions) would require completely different searches in non-patent databases, and there is no exception that the searches would be co-extensive. Therefore, these do not create an undo search burden, and restriction for examination purposes as indicated is proper.

Art Unit: 1627

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

9. Applicant is required to reply to this restriction requirement within 30 days of mailing this action. See MPEP 809.2(a).
